## EXTENDED PRODUCERS RESPONSIBILITY (EPR) PLAN

IN RESPECT OF

### ADSUN IMPEX PRIVATE LIMITED

We ADSUN IMPEX PRIVATE LIMITED at 118-C, PHASE-V, SECTOR-56, HSIIDC INDUSTRIAL ESTATE, KUNDLI ,HARYANA-131028, manufactures of LED TV PANEL AND FEATURE & SMART PHONE BATTERIES. Being producer as per E-waste (management) rules,2016, We hereby submit our EPR Plan. We proposes to implement EPR through Auctus E Recycling solutions Pvt limited, that works as a PRO for many other organizations and has substantial experience in Collection, storage, transportation, recycling and disposal of E waste.

#### GENERAL SCHEME OF COLLECTION :

We have associated with Auctus E Recycling solutions Pvt limited, that works as a PRO ,Recycling and disposal of E waste .As per agreement Auctus E recycling solutions Pvt. Ltd collects E-waste generated from PAN India and recycling at their plant.

#### Collection through "Door to Door" teams

In some areas Auctus E- Recycling solutions Pvt limited shall resorts to "door to door collection" of the product. In presence of such strategy, take back of end of life products from customers will be considered.

#### Bulk Consumers

Bulk consumers have since been brought in the ambit of e waste Regulation, where in they will now be required to give back their End of Life products to the producers. ADSUN IMPEX PRIVATE LIMITED being a producer of LED TV PANEL AND FEATURE & SMART PHONE BATTERIES set gains to collect a large amount of E waste from the Bulk consumers.

#### Compliance by Distributors and Retailers

The home appliances Dealers and Retailers until now had been excluded from E Waste rules and were channelizing WEEE to informal refurbishes and dismantlers. However, they have since been brought in the fold of E Waste Rules hence will be given accounting responsibility in the take back system. Dealers and Retailers will now have to start a collection point with in their areas of sale.

Exchange scheme To enhance collection of WEEE, ADSUN IMPEX PRIVATE LIMITED will resort to exchange schemes, these schemes are aimed at incentivizing the customer to return his EOL products for recycling and will be executed through the sales net work.

## **Methods to Overcome the shortfall in E Waste collection Target**

Be that as it may, there is likely to be a shortfall in the collection targets of WEEE by above mentioned methods. The prevailing Regulations on E Waste permit purchase of E Waste by producers through their PROs , E Waste exchanges or directly from the market or informal sector to overcome the shortfall. ADSUN IMPEX PRIVATE LIMITED proposes to appoint Auctus e Recycling Solutions Pvt limited as one of its PROs for collection, storage, treatment, recycle and disposal of WEEE on its behalf from informal sector.

- a. **Purchase of E waste from open market** This is an unchartered territory and is marked by quick profiteering. It can react very adversely, if large scale shopping of e waste is carried out by producers from open market. Auctus as a PRO has the knowledge and knows the pulse of this market to meet shortfalls in target.
- b. PRO will also collect E Waste from sources that are not EPR compliant, such as bulk consumers, dealers and customers to meet the short fall in targets.
- c. Auctus E Recycling Solutions Pvt Ltd as PRO also plans to carry out door to door collection of appliances in residential areas under its own stewardship. Such a collection can be transferred to ADSUN IMPEX PRIVATE LIMITED at a differential fee.

## Modus operandi of Collection of E-waste

**Take back system for collection of E waste** requires setting up of the following:-

- a. **collection points** : This is the first line of collection, generally established by the service centers, dealer or distributor . The customer drops his WEEE at a respective Collection point and is paid a standard incentive for his goods. The dealer will ensure that the WEEE collected by him is channelized in the waste stream and not resold unethically.  
  
PRO can pick up WEEE from a number of collection points periodically or if the quantity of WEEE is sufficiently large the pickup can take place directly from collection points such as bulk consumer thus avoiding staging of WEEE .
- b. **Collection centers** : Collection Centers will be established by Auctus as PRO in locations as mentioned in succeeding paras. Auctus as PRO will transport the WEEE from Collection Centers to its recycling facility at Greater NOIDA or Ghaziabad or any other dismantling / recycling facility that it may tie up with.
- c. **Roving Collection Mechanism** : In remote areas Auctus as PRO may send a vehicle periodically or on demand and establish a central collection point for a certain period of time.
- d. **Collection through informal sector**: The prevailing system of e waste collection by informal sector is highly organized, with each area in the city allocated to an informal recycler. Auctus has appointed some informal scrap dealers in each town / city to collect e waste on behalf of producers and incentivize them for their services.
- e. **Collection through RWAs in Metros** : Auctus E Recycling Solutions Pvt Limited as PRO is coordinating with housing societies for door to door collection of e waste. It will involve the informal sector in collecting e- waste.
- f. **WEEE Call center** : Auctus E Recycling Solutions Pvt Limited as PRO has established a help line with toll **free number 1800-2700-038** to help direct individual customers in WEEE disposal.

WEEE collected from various sources will preferably be transported directly to the recycling / dismantling facility to prevent multiple handling. However the quantity of WEEE is critical parameter for transportation.
