

EPR-Plan

Extended Producer Responsibility- Take-Back Programs

1. Collection Points for Take-Back of e-waste

Introduction:

Samsung is one of the few producers of the Electrical & Electronics Equipment Company (EEE) who have their own e-waste collection points. Samsung being a responsible company fully believes in sustainable business and a firm believer in doing business in eco-friendly way. All Samsung products are designed and manufactured keeping nature and environment in the center.

E-waste Bin Network:

Samsung believes in completing the life cycle of products by promoting recycling of the resources used in Samsung products. To facilitate this, Samsung has setup a huge network of around 665 e-waste collection bins in the Samsung service centers across India covering all states.

E-waste bins are installed in prominent area like customer lounge, wherein all walk-in customers can easily locate and drop-off their e-waste.

Objective of e-waste bins:

The real objective of the e-waste bins installed in Samsung service centers is to provide Samsung customer a convenient means to dispose their e-waste which is then channelized to authorized e-waste recycler for safe treatment and eco-friendly disposal.

E-waste bins have a unique design. It not only collects e-waste but also acts as an element for promoting e-waste awareness in line with Samsung's philosophy of Eco-Management

How does this work?

Samsung have installed e-waste bins in its service centers. Customers walking-in for their routine service requirement will be guided on e-waste & its hazards and benefits of safe disposal by service executive in the customer lounge.

Customer will be informed how Samsung can help in safe disposal of e-waste and will be guided for dropping-off their e-waste in the e-waste bins provided.

E-waste, thus deposited will be dispatched to collection centres being setup from where the same will be channelized to authorized recycler(s).

Who will be benefitted?

This initiative will help customers to leverage upon Samsung's wide network of e-waste collection points. Customers can conveniently dispose their e-waste at a nearest location. Customer will get one -stop solution for all their service and recycling needs at collection points.

Awareness campaigns

Collection points installed with e-waste bins and a well laid out customer lounge shall be used for organizing E-waste awareness campaigns on a periodic basis.

1/36

Customers will be encouraged to walk-in & participate in e-waste campaign. These campaigns will be conducted at same time on PAN India basis.

Customers will be educated on e-waste hazards and benefits of safe disposal through various methods including videos/animations on digital displays, Standees, posters, stickers and face to face interaction with service executives.

Customers participating in campaigns will be provided with Green Gifts with to spread the e-waste message

What change it will bring?

Reaching out to large base of customers & creating awareness on e-waste is the biggest challenge today. Samsung with its wide network of customers shall overcome this challenge by reaching out to its customer & this direct touch will also help to deal with the informal sector. Customers will be guided on hazards to environment if the e-waste is disposed through informal sector and how Samsung can channelize the collected e-waste to the authorized recycler and ensure a safe treatment and recycling.

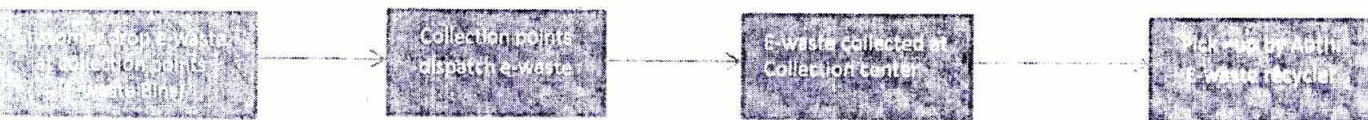

How Samsung can meet e-waste target?

Samsung wide network of service centers and its Best-in Class service experience is already a differentiating factor in India market place. This experience will be further extended to customers for e-waste collection & disposal services as well.

Samsung can reach out to large no. of its customers and can meet its e-waste target obligation by establishing a direct connect, organizing e-waste campaigns & providing collection points in near to customers.

Flow Chart:

1. Channelization from collection points

2. Samsung Take-Back & Recycling Program (S.T.A.R)

Introduction:

Samsung India Electronics Pvt. Ltd has Samsung Take-Back & Recycling Program. Under this Program Samsung customers can call Samsung plans to reach out to customers at their doorsteps to provide excellent services.

How does this work?

24 X 7 operational Samsung call centers will receive request from customers and dealer. Call will be assigned to the authorized recycler/service /logistic partner.

The authorized partner will visit to customer house/dealer and pick up e-waste material. E-waste recycler representative will also educate customers about the e-waste and its hazards and will encourage them not to mix e-waste with general waste and dispose it responsibly.

Who will be benefitted?

With this unique initiative, all Samsung customers specially those living in outskirts and in the remote locations will get connected to Samsung network and will be aware about e-waste and its hazards.

What change it will bring?

Reaching to customers at their doorstep will give Samsung advantage to deal with the informal sector directly and access to the e-waste lying in the household. Customers will get a safe option to dispose their e-waste directly to the manufacturer/ producer. Samsung will channelize the collected e-waste to the authorized recycler and ensure a safe treatment and recycling.

Awareness campaigns

The authorized partner representative will be the most effective medium of awareness where the trained and educated engineer will spread awareness about the hazards of e-waste.

How Samsung can meet e-waste target?

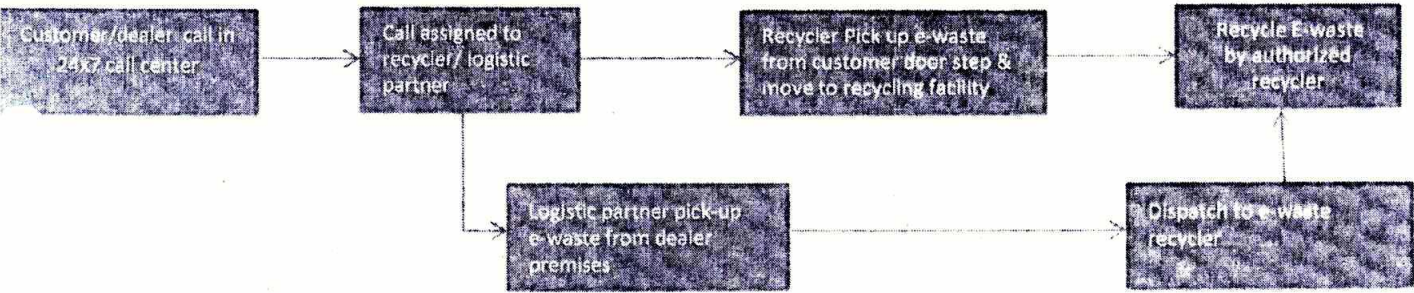

Samsung by virtue of its wide network of authorized partner can penetrate in remote areas and can reach out to large no. of customers. Through this program Samsung can meet its e-waste target obligation easily by establishing a direct connect with its customers and customers will also get a new and authentic medium at their doorstep to channel their e-waste in a safe and environment friendly mode.

3/36

Flow Chart:

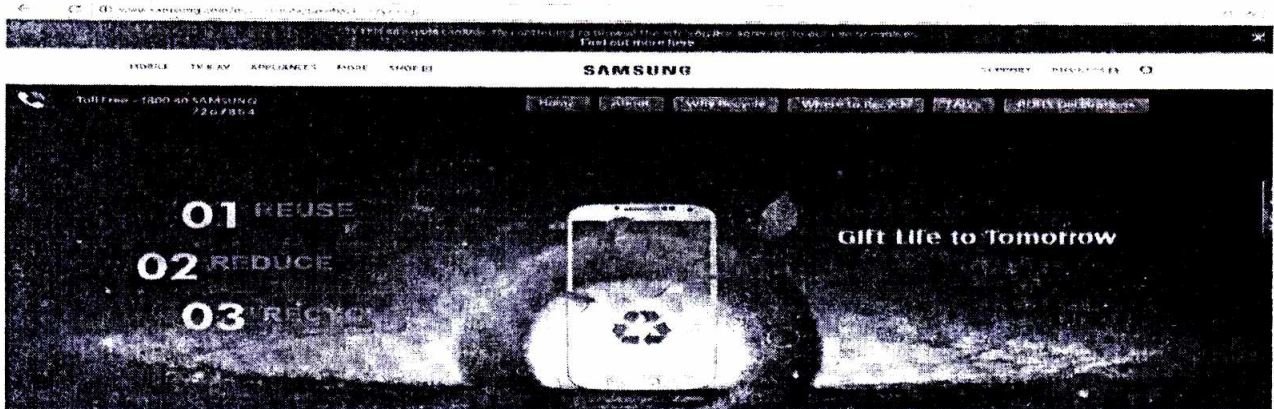

2. Pick-up of EOL product from customer doorstep/Dealer collection
