

Brief on General Scheme of Collection

TPV Technology Pvt., Ltd. has started selling its products **Monitor / TV / Signage etc..** in India since 2001. Regular E-waste generated during the service process is channelized for recycling through our authorized recyclers, In respect of E waste management and handling rule 2016, we are assigning Attero Recycling Private Limited as a authorised recycler:

- i) Attero Recycling Private Limited having their recycling plant in Roorkee, Uttrakhand.

E-waste generated through End of life products from end consumers and service waste will be channelized through our existing setup of service centers which will act as **collection points for such products/waste**. At present the total number of collection points is **106 no's** . List of all the service centers with centralised contact number is also available to all the customers who visit TPVs official website.

Customers will be updated about the offers provided by TPV for collection of the EOL unit through online, offline media and awareness activities.

All the defective products and service waste collected at these collection points will be shipped to collection centers and will be finally shipped by Attero to Roorkee to its recycling plant for Recycling.

Date: 13-Jun-2017

Collection and Channelization System of PRO

Flow of E-waste from Attero Collection Centers to its Recycling Facility.

M. Anish
IPV Techno

We care environment!

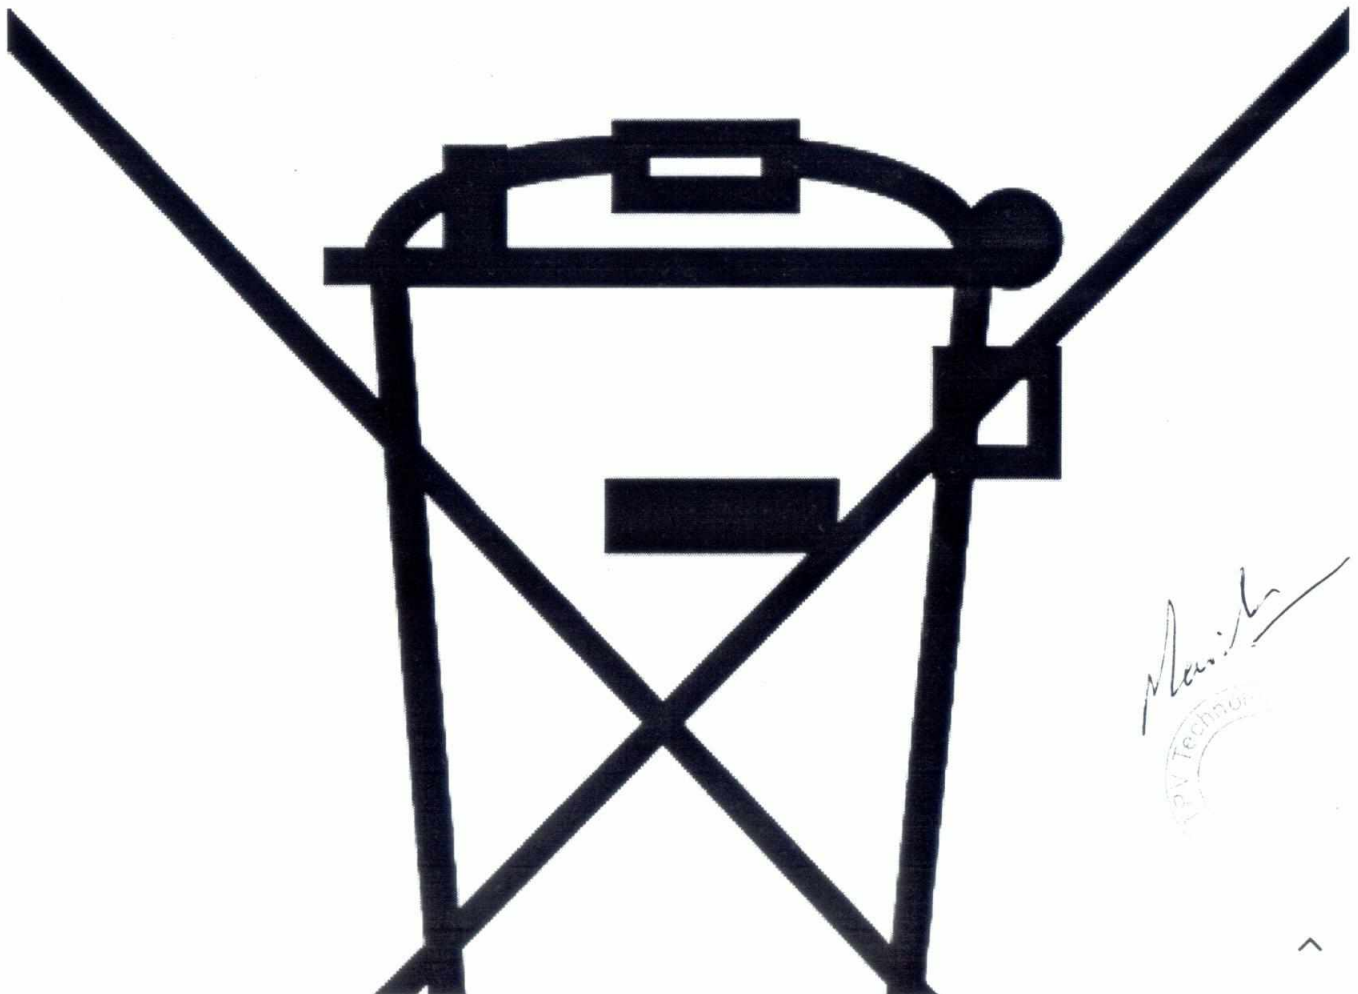

Electronic waste (e-waste) or Waste Electrical and Electronic Equipment (WEEE) are used to describe discarded electrical or electronic devices. This definition includes used electronics such as computers, their peripherals, office electronic equipment, electronic entertainment device, Tablet PC, mobile phones, television sets and refrigerators.

As technology progresses and human dependence on electronic devices increases so does the quantity of e-waste which is being generated. While these devices make our lives more comfortable we have the responsibility to ensure the safe and efficient disposal of these electronic devices at the end of their life and so that they don't adversely affect our environment. Most of the above mentioned electronic devices and components contain various types of materials which can be recycled and recovered for future use. By doing this we are preventing the further extraction and usage of our already limited natural resources. Also recycling reduces the amount of green house gases which is generated during a new products manufacturing.

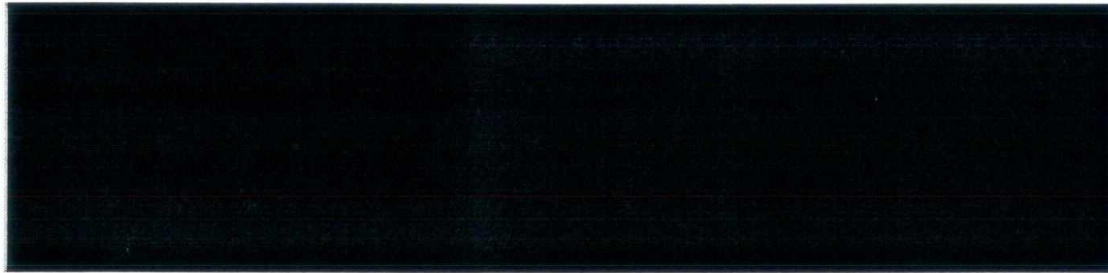

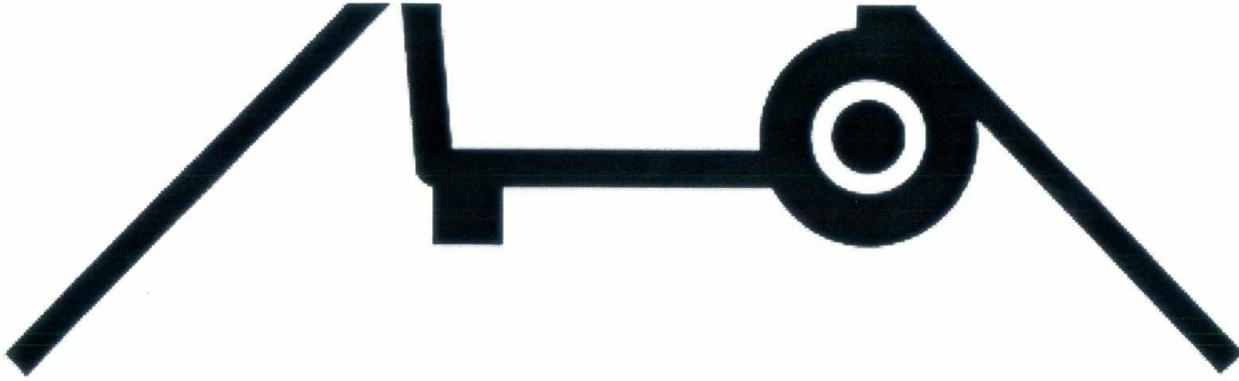

The AOC Brand along with its parent company IPV Technology Ltd is fully committed to the cause of the environment and on being as green as possible. In India as well we have agreements with respected vendors in the field of electronic waste disposal. It is also the responsibility of every customer to ensure that their product is disposed of safely and in the proper method.

As per Rules, 2016* CHAPTER V, rule 16, sub-rule (1) - if you see the below symbol on your electronic product such as a TFT LCD Monitor, Tablet PC and Smart Phone or TV it means that the product is to be considered as E-Waste and cannot be disposed of along with day to day household waste in ordinary garbage bins.

Such products have to be disposed of with a designated and authorized collection center. To get further information on how to do this please contact us through the below number or by mail. Our Executives will guide you on the proper process for disposal of your used AOC LCD Monitor and TV.

It is also the responsibility of every customer to ensure that their product is disposed of safely and in the proper method.

As per Rules, 2016 CHAPTER V, rule 16 (sub-rule 1) - if you see the below symbol on your electronic product such as a TFT LCD Monitor, Tablet PC and Smart Phone or TV, it means that the product is to be considered as E-Waste and cannot be disposed of along with day-to-day household waste in ordinary garbage bins.

Such products have to be disposed of with a designated and authorized collection center. To get further information on how to do this, please contact us through the below number or by mail. Our Executives will guide you on the proper process for disposal of your used AOC LCD Monitor and TV.

E-Waste Compliance for all AOC Product Categories

HANDLING & DISPOSAL OF E-WASTE GENERATED

In India, E-Waste (Management and Handling) Rules 2016 have been notified by the Central Government. TPV TECHNOLOGY INDIA PVT. LTD. stands committed to implement E-Waste Rules. TPV TECHNOLOGY INDIA PVT. LTD. has done tie-up with the government authorized e-waste recycler for facilitating our Channel partners/customers to enable them to dispose of e-waste products after its end-of-life products (when a product is non-operational or non-repairable) and also defective spare parts.

In this process, the channel partners/customers need to get in touch with TPV TECHNOLOGY INDIA PVT. LTD. (Email: serviceindia@aoc.com ; Tel : 080-3023 1000) & TPV TECHNOLOGY INDIA PVT. LTD. in turn will get in touch with its authorized recycler "Attero" (Toll free number- 1800-419-3283) to log a request for disposal of product.

TPV TECHNOLOGY INDIA PVT. LTD. will works closely with its customers, channel partners and recycler in the course of our day to day business activities towards promoting environmental conservation.

TPV TECHNOLOGY INDIA PVT. LTD. Channel partners should contribute to resource conservation and prevent potential environmental problems by a simple action — the proper depositing of their old consumer durable products, its accessories or defective spares.

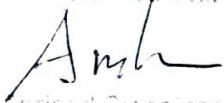

Recycling of all the Components of the Product:

Many customers might think that end-of-life products are worthless, but they still contain many reusable or recyclable materials. Let's see how all parts of end of life products could be recycled.

1. The TPV TECHNOLOGY INDIA PVT. LTD. machines components made of MS, copper, aluminum etc. used in our products can be recycled and re used helping us save the environment.
2. Valuable metals are used as component materials for the circuit board and remotes. During the smelting process, valuable metals such as gold, silver, and copper can be retrieved from these electronic parts. The metals that are retrieved can be used for new electronic parts or can be sold separately on their own.
3. Plastic materials are used for structural components such as the covers, fans & ink cartridges etc. The plastic materials that have been collected are recycled as energy resources after going through a heat recovery process. Alternatively, they can be used as a form of recycled plastic once they have been broken down and processed.

This initiative is the step towards a cleaner and greener earth. This move is one of the ways to show that we are concerned and thus we request all our customers to join this movement to make it successful by way of contributing their end-of-life products and defective spare parts.

FAQ :

How to identify that this is an e-waste product

Any electrical or electronic part/product/accessories having wires / PCB and, it is not usable and cannot be repaired

Why re-cycling should be done? Benefits.

Recycling of old electronic product is beneficial in following ways:

1. There is need to encourage recycling of all useful and valuable material from e-waste so as to conserve the ever depleting natural resources. Recycling end-of-life products is vital if we are to save resources and minimize waste.
2. Also scientific disposal of e-waste reduces the environment pollution.
3. The correct disposal of old product will help prevent potential negative consequences for the environment and human health.

What are the negative consequences if proper recycling is not done?

Any disposal through unauthorized agencies/person will attract action under Environment (Protection) Act 1986, which provides for imprisonment up to 5 years or with fine up to Rs. 1 Lac or both.

Followings are negative consequences of disposal of product if not done in scientific way :

1. Toxic material present in e-waste get mixed with earth, air, water etc. and causes health issues.
2. Batteries contains highly hazardous element.
3. Burning of rubber & Plastic in open area causes air pollution.

How the product is to be properly handled while disposing it off.

Product should not be damage, dismantle or thrown in municipal waste. It should be packed and handed over to authorized re-cycler.

What are the effects if the product is dismantled by the user.

All the products are safe for human being to use. However in case of breakage/dismantling in unscientific way could cause damage to environment or human being (directly or indirectly). Chances are there that user might come in contact with chemicals which could cause irritation in skin & eyes, might cause dizziness etc. Also sharp edges of electronic items could cause damage to body.

What will happen if the product is not properly handled and is given/sold to scrap dealer like any other ordinary scrap.

In case e-waste is sold to unauthorized dealers (Kabbadi), they don't have scientific tools to recycle the products and therefore they are not authorized by the Pollution Control Board. In open area

they burn the plastic parts, break the seal of parts which carries gases and try to extract metals. Such smoke and gases pollute the environment. Also hazardous residual are thrown in landfills which is dangerous for land, water, air and living beings.

Do's & Don'ts:

Do's:

1. All electrical and electronic products are required to be handed over only to the Authorized recycler.
2. The product should be handed over only to authorized recycler for disposal.
3. Keep the product in isolated area, after it becomes non-functional/unrepairable so as to prevent its

Accidental breakage.

Don'ts:

1. The product should not be opened by the User himself/herself, but only by authorized service personnel.
2. The product is not meant for re-sale any unauthorized agencies/ scrap dealer/ kabariwalahs.
3. The product is not meant for mixing into household waste stream.
4. Do not keep any replaced spare part(s) from the product in exposed area.
