Sub: Monthly progress Report by State of Haryana regarding Ghaggar and Yamuna Action Plan for the month of June, 2025.

Sir,

Kindly refer to the subject noted above.

In this connection, it is intimated that there are two polluted river stretches in the State of Haryana i.e. river Ghaggar and Yamuna. I have been directed to enclose herewith the progress report of Ghaggar and Yamuna Action Plan of Haryana for the month of June, 2025 on the prescribed format for your kind information and necessary action please.

National Mission for Clean Ganga
Format for submission of Monthly Progress Report in the NGT Matter OA No. 673 of
2018 (in compliance to NGT order dated 24.09.2020)

For the State of Haryana
Upto June, 2025

Overall status of the State:

I. Total Population: Urban Population

- ✓ Ghaggar catchment
Population – 27.6 lacs
- Yamuna catchment
Population – 92.4 lacs
- ❖ Other areas-
Population- 10.8 lacs

II. Estimated Sewage Generation (MLD):

- ✓ Ghaggar catchment
298.24 MLD
- Yamuna catchment
1239 MLD
- ❖ Other areas
117.5 MLD

III. Details of Sewage Treatment Plant:

• **Existing no. of STPs and Treatment Capacity (in MLD):**

- ✓ Ghaggar catchment
75 STPs of treatment capacity of 594.7 MLD
- Yamuna catchment
90 STPs of treatment capacity of 1518.2 MLD
- ❖ Other areas-
36 STPs of treatment capacity of 230 MLD

• **Capacity Utilization of existing STPs:**

- ✓ Ghaggar catchment
461.6 MLD effluent reaching STPs
- Yamuna catchment
1100.2 MLD effluent reaching STPs
- ❖ Other areas
171.2 MLD effluent reaching STPs

- **MLD of sewage being treated through Alternate technology:**

NIL

- **Gap in Treatment Capacity in MLD:**

Yamuna catchment

There is gap of 45 MLD in the installed treatment capacity at present in comparison to requirement in Gurugram. 27 MLD will be covered up by 31.12.2025. Further, STPs of 340 MLD are proposed.

- **No. of Operational STPs:**

Ghaggar catchment

There are total 75 STPs installed in the catchment of river Ghaggar with the capacity of 594.7 MLD. As per latest status, 13 STPs are not meeting the prescribed parameters. The list is enclosed as **Annexure-1**.

Yamuna catchment

There are total 90 STPs installed in the catchment of river Yamuna with the capacity of 1518.2 MLD. As per latest status, 14 STPs are not meeting the prescribed parameters. The list is enclosed as **Annexure-2**.

Other Areas

There are total 36 STPs of 230 MLD capacity installed in the other areas not falling in the catchment of rivers. Out of these 21 STPs are not meeting the prescribed limits. The list is enclosed as **Annexure-3**.

V. Solid Waste Management:

- Total number of Urban Local Bodies and their Population.**

There are 88 Municipalities in the State out of which MC Manesar, Adampur, Siwan have been recently notified as Municipalities. Haily Mandi and Pataudi has been combined and named as new ULB Pataudi Mandi. As per annual report 2022-23, Solid Waste Management 5785 TPD is daily generation of Municipal Solid Waste and the population of all Municipalities is 88, 42,103 as per Census 2011.

- Current Municipal Solid Waste Generation.**

5544 TPD is daily generation of Solid Waste in the State. Brief status regarding management of Solid Waste in ULBs is as under:-

SWM Activities in State	Quantity
Total No. of Wards	1646
Quantity of Solid Waste	5544 TPD
No. of wards with 100% Door to Door Collection	1619
No. of wards where segregation is initiated	1185
Quantity of Wet waste	2854 TPD
Quantity of dry waste	2140 TPD
Quantity of wet waste being processed	2136 TPD
Quantity of dry waste being processed	1795 TPD
No. of vehicles for D2D collection	3401
No. of vehicle with Compartment	3000
No. of vehicles with GPS	3290
No. of GVPs Identified	851
No. of BWG identified	1103
No. of BWG processing on site	117
No. of Solid Waste Challan collected in last three months	Total 792 challan of amounting Rs. 219370/-
No. of Plastic Waste Challan collected in last three months	Total 9784 challans of Rs. 43 Lakh

For processing of dry waste 88 Material Recovery Facilities (MRF) has also been constructed in various Municipalities for channelization of dry waste.

- Number, installed capacity and utilization of existing MSW processing facilities in TPD (bifurcated by type of processing eg- Waste to Energy (Tonnage and Power Output), Compost Plants (Windrow, Vermi, decentralized pit composting), bio methanation, MRF etc.**

As per report submitted by ULBD, there are two existing operational centralized Waste to Compost (WTC) facilities in the State at Rohtak (150 TPD) & Karnal (150 TPD). Apart from the above, two Bio-Methanation plants are operational in Faridabad (5TPD) & Karnal (15 TPD). One Bio-Gas plant of capacity 20 TPD (private party) is operational in Ambala.

Further, there are 3200 no. of compost pits (including park pits) having the capacity approx. 3180 TPD for processing of wet waste and horticulture waste in various MCs. In addition, approx. 11208 household pits have been constructed to encourage the households for home composting in Ambala Sadar, Faridabad, Gurugram, Kaithal, Karnal, Panchkula & Rohtak.

Further, Waste to Energy Plant at ISWM Sonapat-Panipat Cluster of 700 TPD capacities has been commissioned on 16.08.2021. Approximate 6.77 MW electricity is being generated in this plant.

Work of Waste to Energy Plant (2100 TPD) in Gurugram-Faridabad is also under implementation.

- **Action plan to bridge gap between Installed Capacity and Current Utilization of processing facilities (if Gap > 20%)**

Integrated Centralized Waste Processing Approach (Cluster Wise) is being adopted as a long-term approach, with an overall objective to setup regional Waste to Energy, Waste to Compost + RDF processing facilities and Secured Sanitary landfills for scientific disposal of Solid Waste. This approach is more coveted considering the constraints posed by the decentralized approach and its sustainability over long run. As part of this approach, total 13 Clusters have been formed covering all the 88 ULBs of Haryana. Also, under this approach the projects will be set up on PPP mode and single agency/concessionaire will be responsible for Door to Door Collection, transportation, processing and disposal of Solid Waste for a concession period of 22 years.

Currently 2 Waste to Energy Cluster Projects namely Sonapat-Panipat and Gurugram-Faridabad have been awarded and construction of Sonapat-Panipat Cluster (700 TPD) Waste to Energy project has been commissioned on 16.08.2021. The Environmental Clearance of Gurugram-Faridabad (2300 TPD) Waste to Energy Projects has been granted. The construction of the plant is likely to start soon. Once commissioned these two projects alone will cater to 12 approx. 40% processing of entire waste being generated in the State. Further, 3 Waste to Compost Cluster Projects namely Karnal-Kaithal-Thanesar (638 TPD), Bhiwani (155 TPD), Sirsa (168 TPD) have been finalized.

Remaining eleven (11) clusters are Open Technology Clusters. The details of 13 clusters are attached at **Annexure-4**.

- **Bioremediation of legacy waste lying at existing dump sites.**

Approximate 101 Lakh Metric Ton of legacy waste was lying at the dumping sites in Municipalities, out of which 50.86 lakh MT (50.17%) of legacy waste has been remediated. The details of the same areas under:-

The State Government has approved Rs. 262.67 Crore for bioremediation of legacy waste and out of approved amount Rs. 181.59 Crore has been released.

- No. and capacity of C&D waste processing plants in TPD (existing, proposed and under construction)**

Municipal Corporation, Gurugram has established a processing plant of Construction and Demolition waste at Village Basai to treat 300 MT of C&D Waste which has been now increased to 1200 MT of C&D Waste daily and will be further increased to 1500 MT shortly. Two number agencies have also been empanelled to collect and transport the C&D waste from the household's upto the designated locations.

Further, Municipal Corporation, Faridabad has also established 300 TPD C&D Waste Management Plant.

- Total no. of wards, no. of wards having door to door collection service, no. of wards practicing segregation at source**

As per report submitted by ULBD, there are total 1646 wards in MCs of Haryana out of which 1613 wards have been covered with door to door waste collection services. Out of the total wards, source segregation has been initiated in 1179 wards.

- Details of MSW treatment facilities proposed and under construction (no., capacity, and technology).**

Detail is attached at **Annexure-4.**

- **No. and area (in acres) of uncontrolled garbage dumpsites and Sanitary Landfills.**

The detail of dumpsites attached at **Annexure-5.**

- **No. and area (in acres) of legacy waste within 1km buffer of both side of the rivers.**

No such data is available at present.

- **No. of drains falling into rivers and no. of drains having floating racks/screens installed to prevent solid waste from falling into the rivers**

The drains of MCs don't falls directly into the rivers. They ultimately join the drains of irrigation and the drains of irrigation falls into the rivers. The MCs are installing the wire mesh in the drains to prevent the solid waste from falling into the drains. At present approximate 387 small drains have been provisioned with wire mesh screens.

The Nodal Department for execution of Bio/ Phyto- Remediation identified. The SPV also asked the Department to submit the locations where the phyto remediation/bio-remediation wherever feasible.

ULB Department has started bio/ phyto remediation works in the drains in Municipal Corporation, Yamuna Nagar – Jagadhri, as a pilot project, which will be replicated at other places. Municipal Corporation of Sonapat has also invited tenders for the bio/ phyto remediation of drains. Similarly, Municipal Corporations of Gurugram and Faridabad are in the process of preparing the proposals for bio/ phyto remediation. Municipal Corporation of Panipat has already floated the tenders for the process in their jurisdiction. GMDA has also initiated a pilot project as an interim treatment for untreated discharge of Leg I via geo-synthetic dewatering tubes in consultation with CPCB. PHED has undertaken the *in-situ* phyto/ bio remediation in its new STPs at Indri and Beri. Chief Secretary, during the review meeting held, has also directed that all concerned Departments shall expedite the work on Bio/ Phyto-Remediation.

X. Identification of polluting sources including drains contributing to river pollution and action as per NGT order on in situ treatment:

There are locations where the untreated/partially treated effluent is joining the main drains discharging into rivers. The action plans for control of pollution at these points is required to be submitted by Concerned Departments.

(C) Ground water quality status in the vicinity of river Ghaggar

Ground water quality is being monitored at 80 locations in the catchment of river Ghaggar by HSPCB. Out of total 80 locations, ground water is found fit for drinking at 67 locations and non-complying at 13 locations. Directions have already been conveyed to all the task forces to cap such water sources and a display board mentioning that "Water is not for drinking purpose" may be placed.

(C) Ground water quality status in the vicinity of river Yamuna

Ground water quality is being monitored at 81 locations in the catchment of river Yamuna by HSPCB. Out of total 80 locations, ground water is found fit for drinking at 55 locations and non-complying at 25 locations. Directions have already been conveyed to all the task forces to cap such water sources and a display board mentioning "Water is not for drinking purpose" may be placed. The same has been compiled by the task forces.

XIV. Ground water regulation:

The industries are being persuaded to obtain permission from CGWA/HWRA for extraction of ground water.

XV. Good irrigation practices being adopted by the State:

The major demand for river water is for Irrigation purposes and accordingly the State of Haryana has taken initiatives for water efficient farming practices which are given as under:-

(b) Installation of community based solar/grid powered micro-irrigation infrastructure in existing canal commands

Six communities based solar/grid powered micro-irrigation facilities have been installed for Irrigation of 768 hectare land.

In order to implement project of Micro Irrigation (MI) speedily, Government has decided to adopt bottom up approach i.e. 100% consent of stakeholders (farmers) for adoption of MI system shall be taken before execution of the project. The farmers or group of farmers who come forward with the chak of minimum 25 acres to adopt micro irrigation in their fields and also give consent to provide land free of cost for construction of tank for storage of water as per requirement of the chak for micro irrigation activity, Government shall provide all infrastructures like: laying of pipelines, construction of storage tanks, solar pumps etc free of cost & 95% subsidy shall be provided to on-farm drip and sprinkler micro irrigation components. The web portal for online application of farmers has also been launched.

XVI. Demarcation of Floodplain and removal of illegal encroachments:

All the construction activities are banned on river Yamuna/Ghaggar Flood Plains and no encroachment on river Yamuna is allowed as per section 45 of Haryana Canal and Drainage Act, 1974. However, if any encroachment exists on river Yamuna/Ghaggar is immediately removed in accordance of this Act.

**XVII. Maintaining minimum e-flow of river:
River Ghaggar**

It is brought out that Ghaggar River is not a perennial river and discharge varies from zero to maximum during flood seasons. Around 15-20% of the lowest possible discharge in the lean season is required for maintaining E- flow. In our case the discharge varies from zero to maximum so maintaining E-flow is not possible. However, the monthly flow of all the major drains joining river Ghaggar is being measured regularly on monthly basis.

River Yamuna

It has been reported by the Irrigation and Water Resources Department, Haryana that as per MoU dated 12.05.1994 signed among the States of UP, Haryana, Rajasthan, Himachal Pradesh & NCT of Delhi, a minimum discharge of 352 cusec water is released in Yamuna river from Hathnikund barrage at lean period also to maintain the E-flow of river which was in accordance with the

guidelines of Ministry of Water Resources, River Development & Ganga Rejuvenation, Govt. of India in compliance of the order of Hon'ble NGT dated 11.06.2015. However, in case excess discharge is received at HKB (in monsoon seasons) in comparison to capacity of channel, then this excess discharge is released into river Yamuna through Somb Nadi and the indented supply is released in the channel.
